14MM SYSTEM

11MM LAYER OF SBR RUBBER BOUND IN POLYURETHANE

NRG TRACK 500

IMPERMEABLE SANDWICH SYSTEM

Our most durable running track system featuring our paved-in-place base mat, this value-added, impermeable, sandwich running track surface can withstand consistent, year-round use.

The NRG 500 running track system is comprised of a paved-in-place polyurethane base mat, topped with a two-component seal coat, which is then finished by hand with a flow-applied layer of two-component polyurethane that comes in a range of premium colors.

HIGHLIGHTS

Impermeable Sandwich Style System

Available in Multiple Premium Colors

Delivers High Energy Return

World Class Performance for Competition

14mm System

Unrivaled Force Reduction
